

Ondřej Úlehla

Fullstack Developer & AI Engineer

ondrej.ulehla@netgenium.com · github.com/ondraulehla · Prague, Czech Republic

I work across the whole product lifecycle: I sit down with clients, analyse their needs, propose an architecture, and then build it — frontend, backend and infrastructure alike. Lately my focus has shifted heavily towards AI engineering: LLM-powered features, agentic workflows and retrieval pipelines that actually make it to production.

What sets me apart is the combination of engineering depth and client-facing work — I write the analysis, defend it in the meeting room, and then deliver the code that makes it real.

EXPERIENCE

Fullstack Developer & Analyst · NetGenium Jan 2023 – Present

Development of enterprise applications on a low-code platform, client analyses and custom integrations.

- Led analysis and delivery of smaller client projects end-to-end — requirements, data model, implementation, handover.
- Designed and built AI-assisted features integrating LLM APIs into business workflows.

TypeScript · React · Node.js · SQL · Claude API

EDUCATION

FIT — Faculty of Information Technology Sep 2019 – Jun 2023

B.Sc. in Computer Science (placeholder)

SKILLS

Frontend:	TypeScript, React, Astro, Tailwind CSS, GSAP, Three.js
Backend:	Node.js, Hono, tRPC, PostgreSQL, Drizzle ORM, Redis
AI Engineering:	Claude API, Agentic workflows, RAG pipelines, Prompt engineering, Evals
Infrastructure:	Docker, Kubernetes, Terraform, CI/CD, Vercel
Client work:	Requirements analysis, Solution design, Workshops & presentations, Technical writing
Languages:	Czech (Native), English (Professional (C1)), German (Basic (A2))
